

Model Obaly a.s. is a dynamic company specialising in the production and sale of corrugated cardboard, packaging made from corrugated cardboard, solid cardboard and laminated cardboard, the sale of a standard range of packaging, and other packaging activities. The company management prioritises company growth based on continual improvements in all areas of its integrated system of management and sustainable development. This approach can be expressed in the following principles:

1. Customers

Our attention is focused, above all, on our customers. We try to understand them and contribute towards their success. We are capable of providing them with innovative new solutions and advanced products produced with the use of the very latest technology. The level of satisfaction among our customers is one of the key criteria in evaluating the success of our enterprise.

2. Quality and safety

Product quality and safety means our products being in continual accordance with the requirements of the valid legislation, the demands of our customers and the very latest advances in research and development relating to the materials and processes used in product realisation. The vision of a zero error rate motivates us to seek effective measures for reducing the number of errors in internal processes to assure the production of a product that fully corresponds to the customer's requirements.

3. Environmental protection and energy management

The observation of all the pertinent legal standards and demands from other interested parties in relation to all aspects of the environment and energy management goes without saying. In the area of pollution prevention, we undertake to identify risks, seek opportunities for further improvements to our environmental profile and minimise any potential risk of ecological accidents. We search for the kind of solutions that will meet demands for considerate and rational use of natural resources. The company management supports the purchase of energy-efficient products and proposals from employees leading to improvements to our energy performance.

4. Employees and health and safety

All our employees are responsible for the results of their own work. We work to improve the professional qualifications of our employees and support their endeavour and their willingness to contribute to the achievement of company goals. We work in teams and interact together as internal customers and suppliers. We focus on the observation of stipulated approaches and their continual improvement. By identifying danger and assessing and managing the risks involved in individual activity, we work to avoid possible injuries and accidents and protect the health of employees and other persons who might be affected by our work.

5. Suppliers and sources

We prefer the kind of suppliers that conform to the valid legislation without exception, meet requirements for the quality of the materials and services they supply, and respect the rules of environmental protection, hygiene and work safety during their operations.

6. Resources ensuring continual improvement to the integrated system

The top management of the company Model Obaly a.s. undertakes to provide the resources necessary to meet the goals of the integrated management system and ensure its further development.
